

2020 ANNUAL REPORT

Our Mission

The mission of the Lung Cancer Research Foundation (LCRF) is to improve lung cancer outcomes by funding research for the prevention, diagnosis, treatment and cure of lung cancer.

Our Vision

Our vision is a world free of lung cancer.

LCRF History

The Lung Cancer Research Foundation has evolved over the years, but one thing remains the same: we are determined to create a world without lung cancer. **Together, we can accomplish more than any one of us can alone.**

Steps for Breath, the first run-walk for lung cancer research and awareness in the country, is launched by Laurie Carson, a tireless advocate for increased funding for lung cancer

Laurie Carson expands her efforts across the country and creates the **Lung**

Cancer Research Foundation (LCRF). Steps for Breath evolves into Strides for Life, one of LCRF's cornerstone events

WALC becomes the National Lung Cancer Partnership (NLCP) and hosts its first 5K Run/Walk, named Free to Breathe.

2005-06

Joan's Legacy officially becomes **Uniting Against Lung Cancer**(UALC) after joining forces with a number of like-minded partners across the country.

NLCP reaches the milestone of contributing \$1 million in research grants.

2009-12

LCRF and UALC join forces to make an even greater impact on lung cancer research by increasing the breadth and depth of their grant programs.

2015-16

LCRF announces its goal of tripling its annual research investment by funding \$45 million in direct lung cancer research through 444 grants by 2024.

2021

2000

2001-04

Women Against Lung Cancer (WALC) is founded by Joan H. Schiller, MD.

Joan's Legacy is founded in honor of Joan Scarangello McNeive.

2007-08

NLCP begins offering free patient resources.

The first **Lung Cancer Action Summit** is held in Chicago.

2013-14

Free to Breathe partners with the **Lung Cancer Mutation Consortium** (LCMC), the largest national initiative testing lung cancer tumors and matching patients to therapies.

2017

LCRF and Free to Breathe merge to make an even greater impact on closing the funding gap for lung cancer research.

LCRF's nationwide walk and yoga events continue under the Free to Breathe name.

LCRF's Research Programs

To date, LCRF has funded 383 research grants, totaling nearly \$36 million. LCRF intends to fund a total of \$45 million in direct lung cancer research through 444 grants by 2024.

LCRF Research Grant Program

The LCRF research grant program funds innovative projects across the full spectrum of basic, translational, clinical, epidemiological, health services, and other research, with a focus on early investigators.

LCRF Research Grant on Disparities in Lung Cancer

Lung cancer disproportionately affects various groups, including African Americans and populations in certain geographic locations. This program funds research on a variety of disparities-related topics.

LCRF Research Grant on Tumor Mutations

This grant program, supported by AstraZeneca, will fund innovative projects that aim to understand primary and acquired resistance to those therapies and to discover novel drug combinations that target concurrent driver mutations for immune mediated adverse events for patients on certain targeted therapies.

Lung Cancer Mutation Consortium

The Lung Cancer Research Foundation coordinates and supports the activities of the Lung Cancer Mutation Consortium (LCMC), an association of more than 20 U.S. cancer centers committed to deepening our understanding of the genetic changes that underlie lung cancers and on improving outcomes in patients whose tumors harbor these oncogenic drivers. Learn more at LCRF.org/LCMC.

2020 Grantees

LCRF Pilot Grant Program

Michael Zimmermann, PhD

European Molecular Biology Laboratory (EMBL, Germany)

Identifying risk factors for lung cancer predisposition through systematic evaluation of environmental carcinogens' activation by the respiratory tract microbiota

William Lockwood, PhD

British Columbia Cancer Agency (Canada)

SNF2 Histone Linker PHD RING Helicase as a novel tumor suppressor gene and risk factor in lung adenocarcinoma development

Chengcheng Jin, PhD

University of Pennsylvania

Targeting the IL-1beta pathway for lung cancer treatment

Hideko Isozaki, PhD

Massachusetts General Hospital

Targeting APOBEC3A induction as a new therapeutic strategy to prevent acquired drug resistance in non-small cell lung cancer

Disparities in Lung Cancer Research Grant Program

Hilary Robbins, PhD, MPH

International Agency for Research on Cancer (France)
Development of risk prediction models to ensure
equitable eligibility for lung cancer screening in
minority populations

Marjory Charlot, MD, MPH

University of North Carolina

Understanding the immune landscape of non-small cell lung cancer in African Americans

Chengguo Xing, PhD

University of Florida

Contributions of tobacco exposure, NNK, and stress to lung cancer risk disparities between AA and CA male smokers

Joshua Campbell, PhD

Boston University

Determining differences in immunotherapy outcomes and immunobiology in African American patients with NSCLC

Community Outreach Programs

Free to Breathe

LCRF moved its events program online for 2020. Free to Breathe Yoga, Kites, and Walk bring participants from all over the nation together to honor loved ones, share community, and fund future lung cancer research. Find out more at LCRF.org/events.

Patient Resources & Support Line

LCRF offers free patient materials as well as a toll-free support line: (844) 835-4325

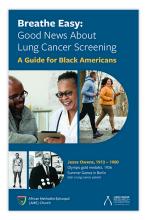

Evening of Innovation

This special event during Lung Cancer Awareness Month in November recognizes newly awarded grantees and highlights the progress that has been made in lung cancer research over the previous year.

#TogetherSeparately livestreams

During the 2020 pandemic, LCRF initiated a series of livestreams to address common questions from patients and caregivers. This grew into an ongoing series with an online community hosted on Facebook Groups. Webinars are on the third Wednesday of each month. Learn more at LCRF.org/togetherseparately.

Breathe Easy Outreach to Black Americans

LCRF and the African Methodist Episcopal Church International Health Commission (AMEC IHC) are working together to raise awareness among Black Americans of the prevalence, risk factors, importance of screening, and prevention of lung cancer. Find out more at LCRF.org/knowyourrisk.

Educational Resources

LCRF provides free resources for patients with lung cancer, caregivers, and health care providers. Below are some of the publications offered. A comprehensive list can be found at LCRF.org/resources.

Living with a Diagnosis of Lung Cancer

Addresses basic questions on lung cancer, treatment options, maintaining hope, and much more. Also available in Spanish.

My Lung Cancer Care Plan

For recording information on diagnosis, tracking treatment and appointments, monitoring symptoms, and much more. Also available in Spanish.

Immunotherapy for the Treatment of Lung Cancer

An introduction to immunotherapy treatment, how immunotherapy works, and typical side effects.

Understanding Squamous Cell Lung Cancer

Explains squamous cell carcinoma and how it can be treated.

Understanding Small Cell Lung Cancer

Explains a small cell lung cancer diagnosis and associated treatment options.

Biomarker Testing for Lung Cancer

Explains the process and importance of biomarker testing to help patients determine if they are eligible for targeted therapies.

Lung Cancer Clinical Trials

An introduction to immunotherapy treatment, how immunotherapy works, and typical side effects.

Caregiving for a Loved One Living with Lung Cancer

An overview of what to expect as a caregiver of a lung cancer patient, helpful tips, and resources.

Living with Hope

Provides stories of hope shared by patients, caregivers, and survivors.

Support Line Flyer

Displays contact and resource information about the Lung Cancer Support Line for patients with lung cancer and their caregivers.

Lung Cancer Fact Sheet

A tool to raise awareness of the incidence and causes of lung cancer, and the role of lung cancer research in making advances in the field.

Lung Cancer Symptoms and Screening

Identifies some of the common symptoms of lung cancer and screening recommendations for those who may be at high risk of lung cancer.

Scientific Grants Program Bookmarks

Showcase LCRF's scientific grants program. One bookmark includes key statistics on research advances made possible by LCRF's grants program and one features quotes from several LCRF grantees.

Personal Lung Cancer Profile

For physicians to use as a tool when speaking to patients about their diagnosis and recommended treatment plan. Also available in Spanish.

LCRF BOARD OF DIRECTORS

As of December 31, 2020

BRENDON M. STILES, MD

Board Chair, LCRF Board

Chief, Division of Thoracic Surgery and Surgical Oncology

Associate Director, Surgical Services, Montefiore-Einstein Cancer Center

KIMBERLY KRAVIS *Vice Chair, LCRF Board*Philanthropist

PETER M. FRYManaging Director, Head of
Alternative Equities, SVB Leerink, LLC

MARY ANN TIGHEVice Chair, LCRF Board
CEO, CBRE

JILL FURMANTheater producer

AARON M. TIGHE
Treasurer, LCRF Board
Managing Director, Credit Suisse
Co-Chair, Guggenheim Museum
Photography Acquisition Committee

REINA HONTSFashion industry executive

KATERINA POLITI, PHDAssociate Professor of Pathology and Internal Medicine, Yale School of Medicine

RONALD D. SERNAUCo-chair, Real Estate Department,
Proskauer

JOAN SCHILLER, MD
Professor, Department of Medicine
Section of Hematology Oncology,
University of Virginia

SCOTT L. STACKMANUBS Private Wealth Management

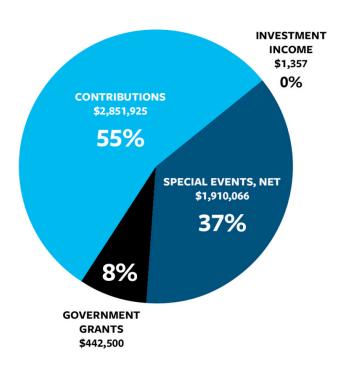

RAYMOND E. CHALMÉ
CEO & Partner, Broad Street
Development LLC

ROSE ANN WEINSTEIN Fashion designer
