

#TogetherSeparately Livestream | November 9, 2020 Chat Transcript

00:05:58 Cassandra Sparrow: Cassandra A. Sparrow, AME Church

00:06:48 Cassandra Sparrow: North Carolina

00:07:05 Aine Calgaro: Hi everyone! I'm with LCRF in Madison, WI

00:07:06 Cristina Chin: Good evening everyone! Cristina here in NYC I work at LCRF

00:07:22 Aubrey Rhodes: Hi everyone! Aubrey here with LCRF in Madison, WI!

00:07:26 peterlewine: Hi...Peter Lewine... with Conrad & Associates...working with LCRF on patient education/disease awareness programs.

00:07:50 Aubrey Rhodes: Hi Peter, nice to Zoom-meet!

00:07:57 Janelle's iPhone: Janelle Baptiste pulmonary physician Boston MA work in lung nodule management. interested in the mission

00:10:40 Aubrey Rhodes: Hi Janelle! Thank you for joining us! Would love to share a little more about the resources that we have available for lung cancer patients. Our resources can be found at [LCRF.org/resources](https://lcrf.org/resources). But you can also feel free to reach out directly to me at arhodes@lcrf.org

00:10:49 Aubrey Rhodes: Hi Amanda! So good to see you!!

00:11:06 Miriam Burnett: Rev. Miriam Burnett, MD; Medical Director of the AME Church International Health Commission. Presently I am in Pennsylvania

00:11:18 Miriam Burnett: Thank you for this partnership

00:13:37 Aubrey Rhodes: Hi @Serena, glad to have you here!

00:26:56 Aubrey Rhodes: You're really great at explaining lung cancer in such a way that's easy to understand.

00:31:48 Dennis Chillemi: Can you describe immunotherapy and how it's different from targeted therapy? Can you receive both therapies?

00:38:14 Aubrey Rhodes: If there are any questions that you'd like Dr. Dagogo to address, please feel free to chat those in.

00:39:51 Amanda DeRosa: What is the reason a lung cancer patient would be told they are not a candidate for immunotherapy (me). I know my tumor was tested and it came back negative for these gene mutations being discussed

00:40:01 Miriam Burnett: Will you speak to the differences in types of lung cancer and those that may be a metastasis from other organs but are not technically lung cancer

00:40:45 Amanda DeRosa: *discussed. Cannot have chemo due to heart condition called Long QT Syndrome - had surgery hopefully curative

00:41:45 Debbie M: how long does a patient typically stay on Keytruda after successful lobectomy?

00:42:36 Amanda DeRosa: I also have an autoimmune disease - Sarcoidosis.

00:45:59 Aubrey Rhodes: Any other questions for Dr. Dagogo?

00:47:02 Cassandra Sparrow: What is a take-home message for prevention?

00:48:37 Miriam Burnett: Can you speak to lung cancer and air pollution

00:50:42 Aubrey Rhodes: November is Lung Cancer Awareness Month and LCRF is working hard to create more visibility, awareness and education for lung cancer to help break the stigma. If you'd like to help fight the stigma, we have lots of awareness and education tools on our social media sites that you can share.

00:55:35 Amanda DeRosa: I've been sharing a ton on my Instagram - so many people are so shocked that young non-smokers like myself can get lung cancer - END THE STIGMA! I'm here to help spread the word!

00:56:28 Aubrey Rhodes: Thank you, @Amanda! We need more advocates like you out there spreading the word!! :)

00:56:45 Cassandra Sparrow: Thanks, Amanda. Your sharing will help many!

00:59:50 Erika Hlavacek: I've had stage 4 lung cancer for 3 years and I still am learning from these webinars. Thank you, Dr. Dagogo-Jack for explaining everything very patient friendly. So appreciated.

01:01:15 Melinda Aldrich: Wonderful! so clearly presented! Thank you.

01:01:25 Aubrey Rhodes: @Erika - so glad to have you here with us and that you found tonight's session valuable!

01:02:03 Aubrey Rhodes: She's amazing!! :)

01:02:20 Megan McGuinness: [LCRF.org/celebrate](https://www.lcrf.org/celebrate)

01:02:49 Aubrey Rhodes: Thank you for joining and sharing, @Melinda!
